

**Title:** Executive Technology Management Consultant

**Status:** Exempt

**Type:** Full-time

**Salary Range:** \$125,000 - \$140,000

**Summary:**

BlueNovo is seeking an Executive Technology Management Consultant. The Management Consultant may be asked to function as a virtual Chief Information Officer/Director of IT/Director of Health IT to assigned health center(s) while also functioning as a support resource to designated vCIOs to assist with various strategic initiatives. The Management Consultant is responsible for the design, development, coordination, and management of the various technology projects assigned by the vCIOs. This technical, operations-centered extended leadership role is seen as a trusted partner of the organization in supporting the Strategy team to become a highly reliable, and scalable value-oriented organization.

This role focuses on the "run" aspect of IT, this enables the CIO to focus on the "grow" and "transform" aspects of IT, through working with customers, building strong relationships with senior management and key stakeholders, driving innovation, and differentiated IT strategy, and improving the business value of IT.

**Supervisory Responsibilities:**

- *None.*

**Responsibilities:**

- *Serve as a virtual Chief Information Officer to various assigned customers*
- *Understand client business challenges and technologies to understand business needs*
- *Outline the scope of the work and identify and map out schedules, milestones, and required resources to meet the project objectives*
- *Capture scope of the work and identify and map out schedules, milestones, and required resources to meet the project objectives*
- *Determine and communicate the work product or results that will be delivered to the client upon project completion*
- *Develop and carry out communications to the customer stakeholders, company staff, and internal and external project teams*
- *Develop research and data collection to understand the organizations conduct analysis*
- *Project manage and implement complex technology solutions*

**Required Professional Attributes:**

- *Bachelor's degree in computer science, information systems, business administration or related field*

- *15 or more years of total experience in IT and business/industry, including: Five to seven years of progressively increasing leadership responsibilities*
- *Five or more years of relevant experience, including but not limited to business/industry, managing multiple, large, cross-functional teams or projects, and influencing senior-level management and key stakeholders*
- *Extensive experience in managing infrastructure and operations*
- *Demonstrated experience in resource management*
- *Familiarity with common business software, project management programs and IT systems*
- *Ability to establish and maintain strong relationships and to influence others and move toward a common vision or goal*
- *Effectively deliver projects on-time, on-budget within the scope that meets or exceeds stakeholder expectations*
- *Demonstrated experience in project management of extensive multi-phase projects*
- *Impeccable organizational and time management skills*
- *Excellent content development and writing skills*
- *Strong working knowledge of business management best practices*
- *Aptitude for analytical and creative thinking*
- *Technical expertise/background in areas of: Networking, Storage, Security, Systems Deployment*

**Desired Professional Attributes:**

- *6+ years' experience as a Management Consultant or another relevant role*
- *Strong team development and mentoring experience*
- *Strong background in data and project governance*
